To the General Meeting in Thrace Polybulk AS

INDEPENDENT AUDITOR'S REPORT

Opinion

We have audited the financial statements of Thrace Polybulk AS (the Company), which comprise the balance sheet as at 31 December 2024, the income statement, statement of comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion

- the financial statements comply with applicable statutory requirements, and
- the financial statements give a true and fair view of the financial position of the Company as at 31 December 2024 and its financial performance and cash flows for the year then ended in accordance with simplified application of international accounting standards according to section 3-9 of the Norwegian Accounting Act.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the financial statements* section of our report. We are independent of the Company in accordance with the requirements of the relevant laws and regulations in Norway and the International Ethics Standards Board for Accountants' *International Code of Ethics for Professional Accountants (including International Independence Standards)* (the IESBA Code), and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of management for the financial statements

The Board of Directors and the Managing Director (management) are responsible for the preparation of the financial statements that give a true and fair view in accordance with the Norwegian Accounting Act and accounting standards and practices generally accepted in Norway, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists.

Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to
 fraud or error, design and perform audit procedures responsive to those risks, and obtain audit
 evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not
 detecting a material misstatement resulting from fraud is higher than for one resulting from error,
 as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override
 of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit
 procedures that are appropriate in the circumstances, but not for the purpose of expressing an
 opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the board of directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Porsgrunn, 04. juli 2025 ERNST & YOUNG AS

General information

Thrace Polybulk AS is a company incorporated and domiciled in Norway. The address of the Company's registered office is Strømtangvegen 15, 3950 Brevik.

The Company comprises the following main business segments:

- FIBC products the sale of polyprophene FIBCs
- Other polyprophene products

Basis of preparation

For small enterprises annual financial statements are prepared in accordance with the Accounting Act § 3-9 and the regulations on simplified IFRS (2014) established by the Ministry of Finance on November 2, 2014. This primarily means that measurement and recognition follow international accounting standards (IFRS), and presentation and notes are in accordance with Norwegian accounting law and good accounting practice.

The accounting policies set out below have, unless otherwise stated, been applied consistently to all periods presented in these consolidated financial statements.

The Financial Statements have been prepared in accordance with the historical cost convention:

- Non-current assets are stated at the lower of previous carrying amount and fair value less costs to sell.
- The defined benefit liability is recognised as the net total of the plan assets less the present value of the defined benefit obligation.

The Financial Statements are presented in NOK, which is the Company's functional currency. All financial information presented in NOK has been rounded to the nearest thousand.

The current global economic conditions continue to create widespread uncertainty, particularly in relation to the level of demand for the company's products.

The company's forecasts and projections, taking account of reasonable, possible changes in trading performance show that the company should be able to operate within the level of its current facilities and meet repayments as they become due. The director has a reasonable expectation that the company have adequate resources to continue their operations for the foreseeable future, and the preparation of Director's report and financial statements is based on going concern.

Classification

Assets and liabilities related to the normal operating cycle are classified as current assets and current liabilities. Receivables and liabilities not related to the normal operating cycle are classified as current if they are of a short-term nature, normally due within one year. Other assets and liabilities are classified as non-current.

Foreign currency

Transactions in foreign currencies are translated at the foreign exchange rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies at the balance sheet date are translated at the foreign exchange rate ruling at that date. Foreign exchange differences arising on translation are recognised in the income statement as other gains/losses (net). Non-monetary assets and liabilities that are measured in terms of historical cost in a foreign currency are translated using the exchange rate at the date of the transaction.

Property, plant and equipment and intangible assets (except goodwill)

Property, plant and equipment and intangible assets are stated at cost less accumulated depreciation and impairment losses.

Where parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items of property, plant and equipment.

Depreciation is charged to the income statement on a straight-line basis over the estimated useful lives of each part of an item of property, plant and equipment or intangible assets.

The useful lives are as follows:

Equipment, computers and software
Cars

3-5 years 5 years

Goodwill

Goodwill is stated at cost less any accumulated impairment losses. Goodwill is allocated to cash generating units and is not amortised but is tested annually for impairment.

Note 1 Accounting Principles continued

Leases

When entering into a contract, the company assesses whether the contract is, or contains, a lease. A contract is, or contains, a lease agreement if the contract conveys the right to use an asset for a period of time in exchange of consideration.

At the time of implementation of a lease agreement, the group recognizes a lease liability and a corresponding right-of-use for all its leases, with the The company measures the right-of-use assets at acquisition cost, minus accumulated depreciation and impairment losses, adjusted for any new measurements of the lease liability. Acquisition cost for the right-to-use assets includes:

- The initial amount of the lease liability
- Any lease payments made to the lessor at, or before, the commencement date of the lease, less any lease incentives received
- All direct expenses for entering into agreements incurred by the group

The company applies IAS 16 "Property, plant and equipment" when depreciating the right-of-use asset, the right-of use asset is depreciated over the shorter of the assets's useful life and the lease term on a straight-line basis. The company applies IAS 36 "Impairment of assets" to ensure that the right-to-use assets are not carried at more than their recoverable amount, and to assess the possibility for future events or changes in circumstances that might indicate impairment losses.

At the commencement date, the company measures the lease liability at the present value of the lease payments that have not been yet paid at that date. The lease period represents the non-cancellable lease term, in addition to periods included by an option to either extend or terminate the lease, in case the group is reasonably certain to exercise that option. The lease payments that are used to measure the lease liability at commencement date include the following:

- · Fixed lease payments, less any lease incentives receivable
- Variable lease payments that depend on an index or rate, initially included in the lease liability using the index or rate at the commencement date of the lease
- · Amounts expected to be payable by the group under residual value guarantees.
- The exercise price of a purchase option if the group is reasonably certain to exercise that option.

The lease liability is subsequently measured by increasing the carrying amount to reflect the interest on the lease liability, reducing the carrying amount to reflect leased payments and measuring the carrying amount again to reflect any revaluations or changes to the lease agreement, or to reflect adjustments in lease payments which follows from adjustments in indexes or rates.

Inventories

Inventories are stated at the lower of cost and net realisable value. Cost is based on the first-in first-out principle and includes expenditure incurred in acquiring the inventories and bringing them to their existing location and condition.

Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expenses.

Cash and cash equivalents

Cash and cash equivalents comprise cash balances and call deposits.

Impairment

The carrying amounts of the company's assets, other than stocks and deferred tax assets are reviewed at each balance sheet date to determine whether there is any indication of impairment. If any such indication exists, the asset's recoverable amount is estimated.

An impairment loss is recognised whenever the carrying amount of an asset or its cash-generating unit exceeds its recoverable amount. Impairment losses are recognised in the income statement.

Calculation of recoverable amount

The recoverable amount of assets is the greater of their fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. For an asset that does not generate largely independent cash inflows, the recoverable amount is determined for the cash-generating unit to which the asset belongs.

Trade and other receivables

Trade and other receivables are recognised initially at fair value and subsequently at amortised cost using the effective interest method, less provision for impairment.

Employee benefits

Defined contribution plans

Obligations for contributions to defined contribution pension plans are recognised as an expense in the income statement as incurred.

Defined benefit plans

The company's net obligation in respect of defined benefit pension plans is calculated by estimating the amount of future benefit that employees have earned in return for their service in the current and prior periods; that benefit is discounted to determine its present value, and the fair value of any plan assets (at bid price) is deducted. The liability discount rate is the yield at the balance sheet date on AA credit rated bonds that have maturity dates approximating to the terms of the Company's obligations. The calculation is performed by a qualified actuary using the projected unit credit method.

Taxes

Income taxes are calculated from the profit (loss) before tax and comprise taxes payable and the change in deferred taxes.

Deferred tax assets and liabilities are calculated in accordance with the liability method without discounting and provided for all differences between the carrying amount in the balance sheet and the tax base of assets and liabilities, and for unused tax losses. Deferred tax assets are recognised only when it is expected that the benefit can be utilised through sufficient taxable profits from expected future earnings.

Note 1 Accounting Principles continued

Financial instruments

Financial instruments are classified into the following categories:

Fair value through profit or loss (FVTPL) and amortised costs. The classification of financial assets is determined in accordance with IFRS 9 *Financial Instruments* and is depended on the business model for managing the financial assets and the characteristics of the cash flows as solely payments of principle and interest (SPPI) or not SPPI. Management determines the classification of all financial assets at initial recognition.

a) Financial assets at fair value over profit or loss

Financial assets at fair value through profit or loss do not meet the SPPI criteria. Derivatives are also always measured at fair value in the balance sheet and over the profit or loss if not designated in a cash flow hedge. Derivatives designated as hedging instruments are at FVOCI. Derivatives designated as hedge accounting instruments are accounted for in accordance with IFRS 9.

b) Amortised cost

Financial assets are initially recognised at fair value. Financial assets subsequently measured at amortised cost meet the SPPI criteria and are managed with a business model of Hold to collect. All financial assets, except derivatives, meet these criteria. The Group's financial assets at amortised cost include accounts receivable, other current receivables and cash and cash equivalents.

Recognition and Measurement

Financial assets carried at fair value through profit or loss are initially recognized at fair value, and transaction costs are expensed in the statement of profit or loss. Financial assets are derecognized when the rights to receive cash flows from the financial assets have expired or have been transferred and the entity has transferred substantially all risks and rewards of ownership.

Financial assets are measured at amortized cost using the effective interest method.

Financial assets and liabilities are offset and the net amount reported in the balance sheet when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis or realize the asset and settle the liability simultaneously.

Impairment of financial assets

A financial asset or a group of financial assets is impaired using the practical expedient of lifetime ECL for accounts receivable in accordance with IFRS 9.

Revenue

Thrace Polybulk AS recognises revenue from customer in accordance with IFRS 15 Revenue from contracts with customers. The entity sells industry packaging. Sales are recognised when control of the products has transferred, being when the products are delivered to the customer, and there is no unfulfilled obligation that could affect the customers acceptance of the products. Delivery occurs when the products have been shipped to the specific location, and the risks of obsolescence and loss have been transferred to the customer.

Revenue from these sales is recognised based on the price specified in the contract, net of the estimated volume discounts, net of returns and volum rebates. The fixed transaction price, which represents the stand alone selling price of each product, is separately stated for each product or batch of products within the contract.

A receivable is recognised when the goods are delivered as this is the point in time when the entity transfer a sold product to the customer. Control of the good transfers immediately at the point of delivery. A receivable is recognised for the delayed payment terms, which is included in the line item Accounts receivable in the balance sheet. No element of financing is deemed present as the sales are made with a credit term of 30 days, which is consistent with market practice.

Net financing costs

Net financing costs comprise interest payable and interest receivable on funds invested. Interest income and interest payable is recognised in profit or loss as it accrues, using the effective interest method.

Trade receivables

Trade receivables are measured at fair value including expected credit loss.

Dividend distribution

Dividend distribution to the company's shareholders is recognised as a liability in the group's financial statements in the period in which the dividends are approved by the company's shareholders.

Changes in accounting policies

New and amended standards adopted by the Company

They have not identified other standards or interpretations that will take effect after January 1st, 2024 and will have a significant impact on Thrace Polybulk's consolidated financial statements.

Significant management judgment in applying accounting policies

When preparing the Financial Statements, management undertakes a number of judgments, estimates and assumptions about the recognition and measurement of assets, liabilities, income and expenses. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and in any future periods affected.

Note 2 Specification of Revenue

Thrace Polybulk AS recognises revenue from customer in accordance with IFRS 15 Revenue from contracts with customers. The entity has one revenue stream from sale of industry packaging, and there is no disaggregation of revenue other than to geographical areas.

Norway	56 195	48 515
Total	56 195	48 515

The group applies the IFRS 9 simplified approach to measuring expected credit losses which uses a lifetime expected loss allowance for all trade receivables. For details about expected credit loss and the ageing of trade receivables see note 15.

The vast majority of the trade receivables are related to significant customers in Norway that have a good payment record with the company. Of the trade receivables as of 31 December 2024, 71 % (2023: 87 %) referred to its three largest customers. All the customers are companies with limited liabilities. The three largest customers are entirely managed by the insurance arrangement, i.e. the company has no credit risk due to these three.

Liquidity risk

The maturities of financial liabilities were:

	2024	2023
Trade payables aging less than one year	27 335	16 076
Other payables aging less than one year	16 690	13 984
Total	44 025	30 060

The Company has no financial obligations other than from operating activities. The working capital in the Company is considered to be strong. Hence the liquidity risk from the Company's activities is considered to be low.

Foreign currency risk

The Company incurs foreign currency risk on purchases that are denominated in a currency other than NOK. The currencies giving rise to this are primarily EUR, THB and USD. The Company also recieves Euros from sales to their largets customers. No formal hedging instruments are used.

The company's exposure to foreign currency risk was as follows based on notional terms:

(Amounts in foreign currency) At 31 December 2023	Trade receivables	Trade payables	Bank Accounts
EUR	4 320	-1 25	4 3
USD	92	2 -10	7 1
GBP	() -	1 0
THB	()	0
At 31 December 2024			
EUR	5 134	-2 06	4 301
USD	4	7 -3	7 1
GBP			
THB		-74	0

The following significant exchange rates applied during the year:

	Average rate		Closing	rate
	2024	2023	2024	2023
EUR	11,630	11,421	11,803	11,241
USD	10,748	10,565	11,340	10,172
GBP	13,738	13,135	14,243	12,933
THB	0,305	0,303	0,334	0,296

Note 18 Financial risk management continued

Fair values

The fair values of financial instruments are not significantly different to the carrying amounts shown in the balance sheet.

Market price risk

The principal market risk relates to fluctuations in the price of polymer raw material. A clause in sales agreement enables the Company to pass on some of the market price risk to its larger customers.

Sensitivity analysis

In managing currency and market risks the Company aims to reduce the impact of short-term fluctuations on the Company's earnings. See above for more details concerning how this is managed.

It is estimated that a general increase of one percentage point in the value of the NOK against other foreign currencies would have an imaterial effect on the company's financial income in the income statement for both 2024 and 2023.

Capital Management

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to provide returns for the shareholder and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital. In order to maintain or adjust the capital structure, the Company may adjust the amount of dividends paid to the shareholder, return capital to the shareholder or sell assets to reduce debt. The Company does not have any interest bearing debt. The working capital of the Company is considered to be strong. The equity is also considered to be strong.

The gearing ratios at December 2023 and 2022 were as follows:

	2024	2023
Trade and other payables	40 178	27 306
Less: cash and cash equivalents	-4 088	-589
Net debt	36 090	26 717
Total equity	68 971	52 114
Total capital	105 062	78 831
Gearing ratio	34 %	34 %

Note 19 Categories of financial instruments

(Amounts	in	NOK	1 ((()))

(AMOUNTS IN NOK 1.000)			
	31 December 2024		
	At fair value	At amorized costs	Total
Assets as per balance sheet			
Trade and other receivables excluding pre-payments	0	40 137	40 137
Cash and cash equivalents	0		0
Total	0	40 137	40 137
	At fair value	At amorized costs	Total
Liabilities as per balance sheet			
Trade and other payables excluding non-financial liabilities	0	40 178	40 178
Lease liabilities	0		0
Short term debt to credit institutions	0	3 846	3 846
Total	0	44 025	44 025
		31 December 2023	
	At fair value	At amorized costs	Total
Assets as per balance sheet			
Trade and other receivables excluding pre-payments	0	50 319	50 319
Cash and cash equivalents	0	0	0
Total	0	50 319	50 319
	At fair value	At amorized costs	Total
Liabilities as per balance sheet			
Trade and other payables excluding non-financial liabilities	0	27 306	27 306
Lease liabilities	0	941	941
Short term debt to credit institutions	0	2 754	2 754
Total	0	31 001	31 001

The carrying amount of cash and a cash equivalents is fair value. The carrying amount of other current loans and receivables approximates fair value as the impact of discounting is not significant. There is no financial instruments categorized as FVTPL.

The group's exposure to various risks associated with the financial instruments is discussed in note 18. The maximum exposure to credit risk at the end of the reporting period is the carrying amount of each class of financial assets mentioned above.
